Soothing moisture toner to tighten and firm up your skin from the first step

Centella Calming Complex

Dermatest

Hypoallergenic

Green Formula

Unlike typical watery toner, this is the first treatment to hydrate your skin with highly concentrated herbal water.

This material is intended for member training purposes only and not for advertisement.

Common Ingredient History

Centella Calming Complex

It is a complex substance that is excellent at soothing and hydrating the skin by adding centella asiatica DNA and centella asiatica extract to our WellBeing certified organic calming water

Centella Asiatica

Centella asiatica, also known as Tiger Grass, is known to help recover damaged skin and boost regeneration

+

Calming Water

It is a complex substance that is WellBeing certified, consisting of 9 types of raw organic herbs

Patented Composition (Registration No. 10-1202393)

+

Centella Asiatica DNA

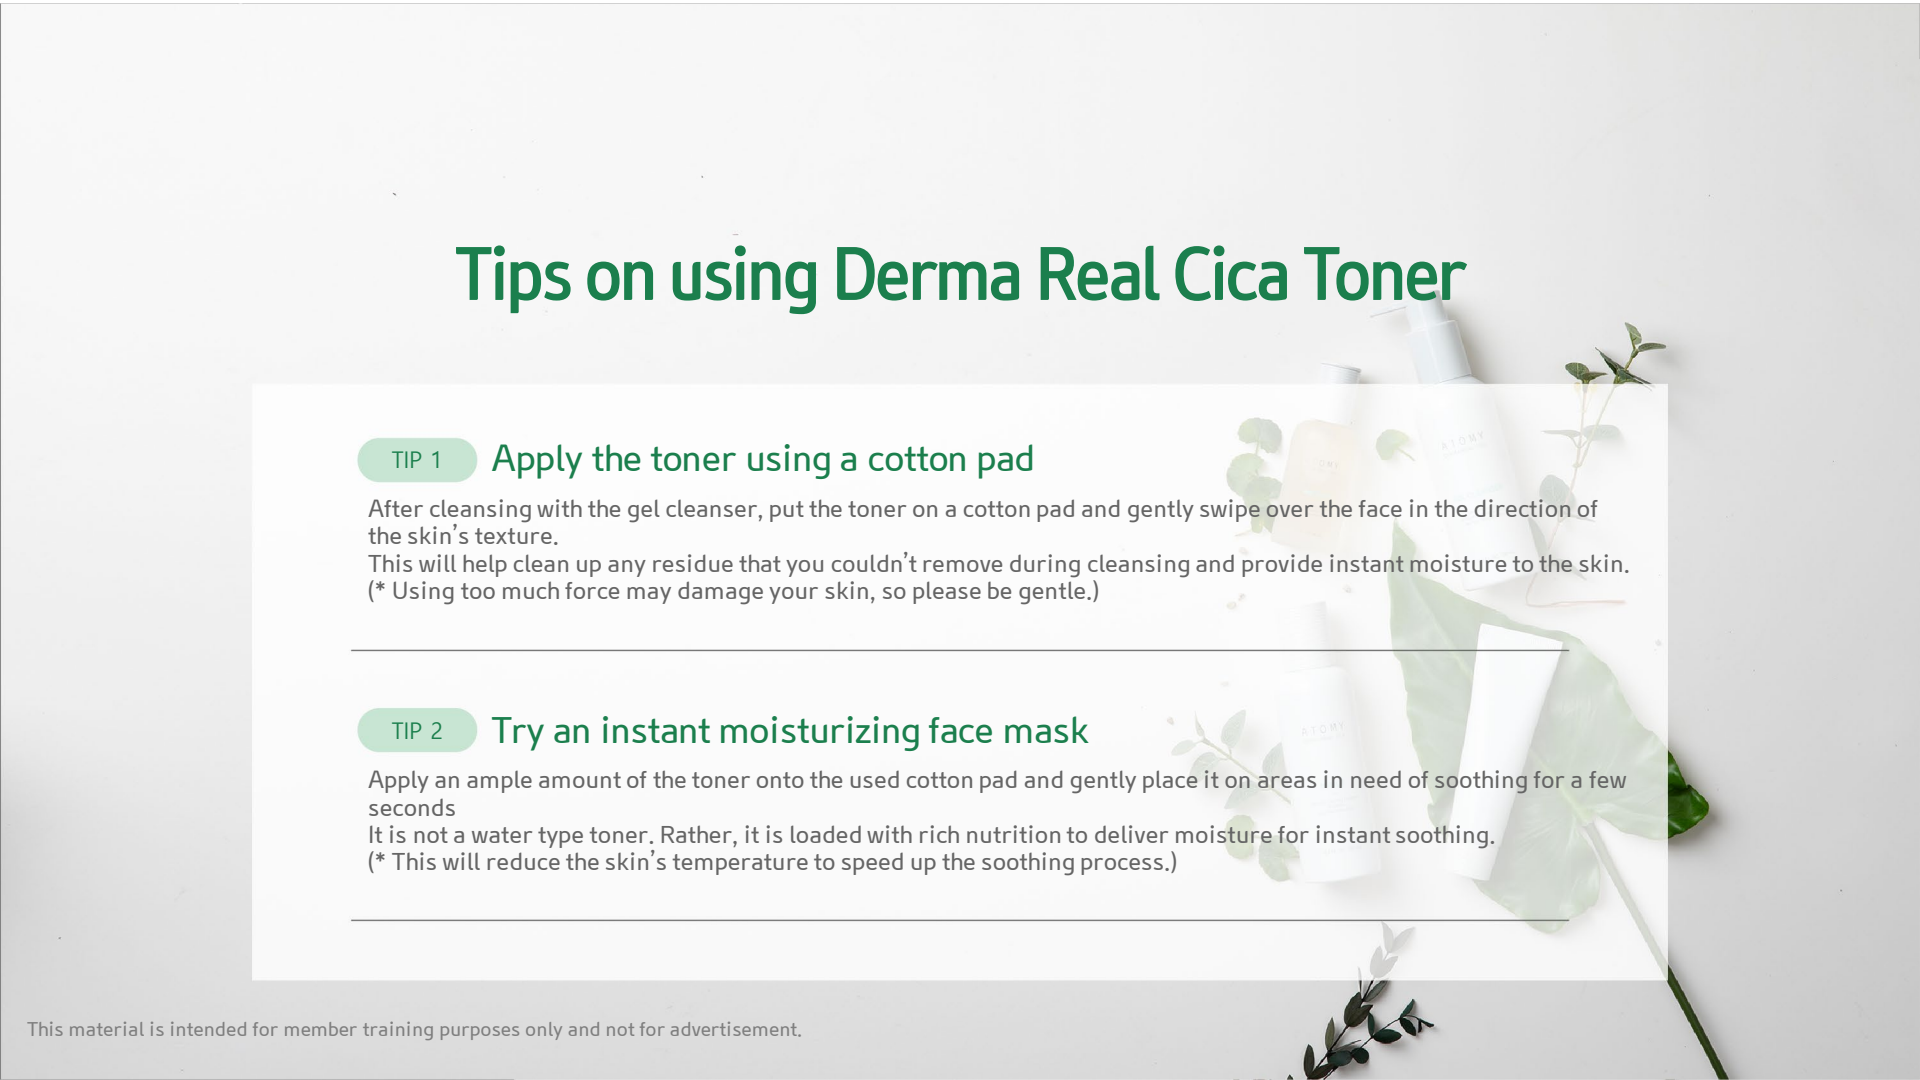

Centella asiatica DNA extracted with natural methods using Deep Salt

CENTELLA CALMING COMPLEX

This material is intended for member training purposes only and not for advertisement.

Tips on using Derma Real Cica Toner

TIP 1

Apply the toner using a cotton pad

After cleansing with the gel cleanser, put the toner on a cotton pad and gently swipe over the face in the direction of the skin's texture.
This will help clean up any residue that you couldn't remove during cleansing and provide instant moisture to the skin.
(* Using too much force may damage your skin, so please be gentle.)

TIP 2

Try an instant moisturizing face mask

Apply an ample amount of the toner onto the used cotton pad and gently place it on areas in need of soothing for a few seconds
It is not a water type toner. Rather, it is loaded with rich nutrition to deliver moisture for instant soothing.
(* This will reduce the skin's temperature to speed up the soothing process.)

This material is intended for member training purposes only and not for advertisement.

A soothing nutrition ampoule that delivers the energy of Cica to your delicate skin

Dermatest

Hypoallergenic

Green Formula

A light-yellow transparent nutrient drop
Covers sensitive areas to help regenerate your skin.

This material is intended for member training purposes only and not for advertisement.

Soothing Nutrition Cica Ampoule

Centella Asiatica Peptide

It is an “autogenic peptide” developed based on the “Plant Cell Biofactories™” technology of a 35-year-old Spanish company, one of the world’s leading influences in cell culture, that helps regenerate cells and heals irritated skin.

Madecassoside

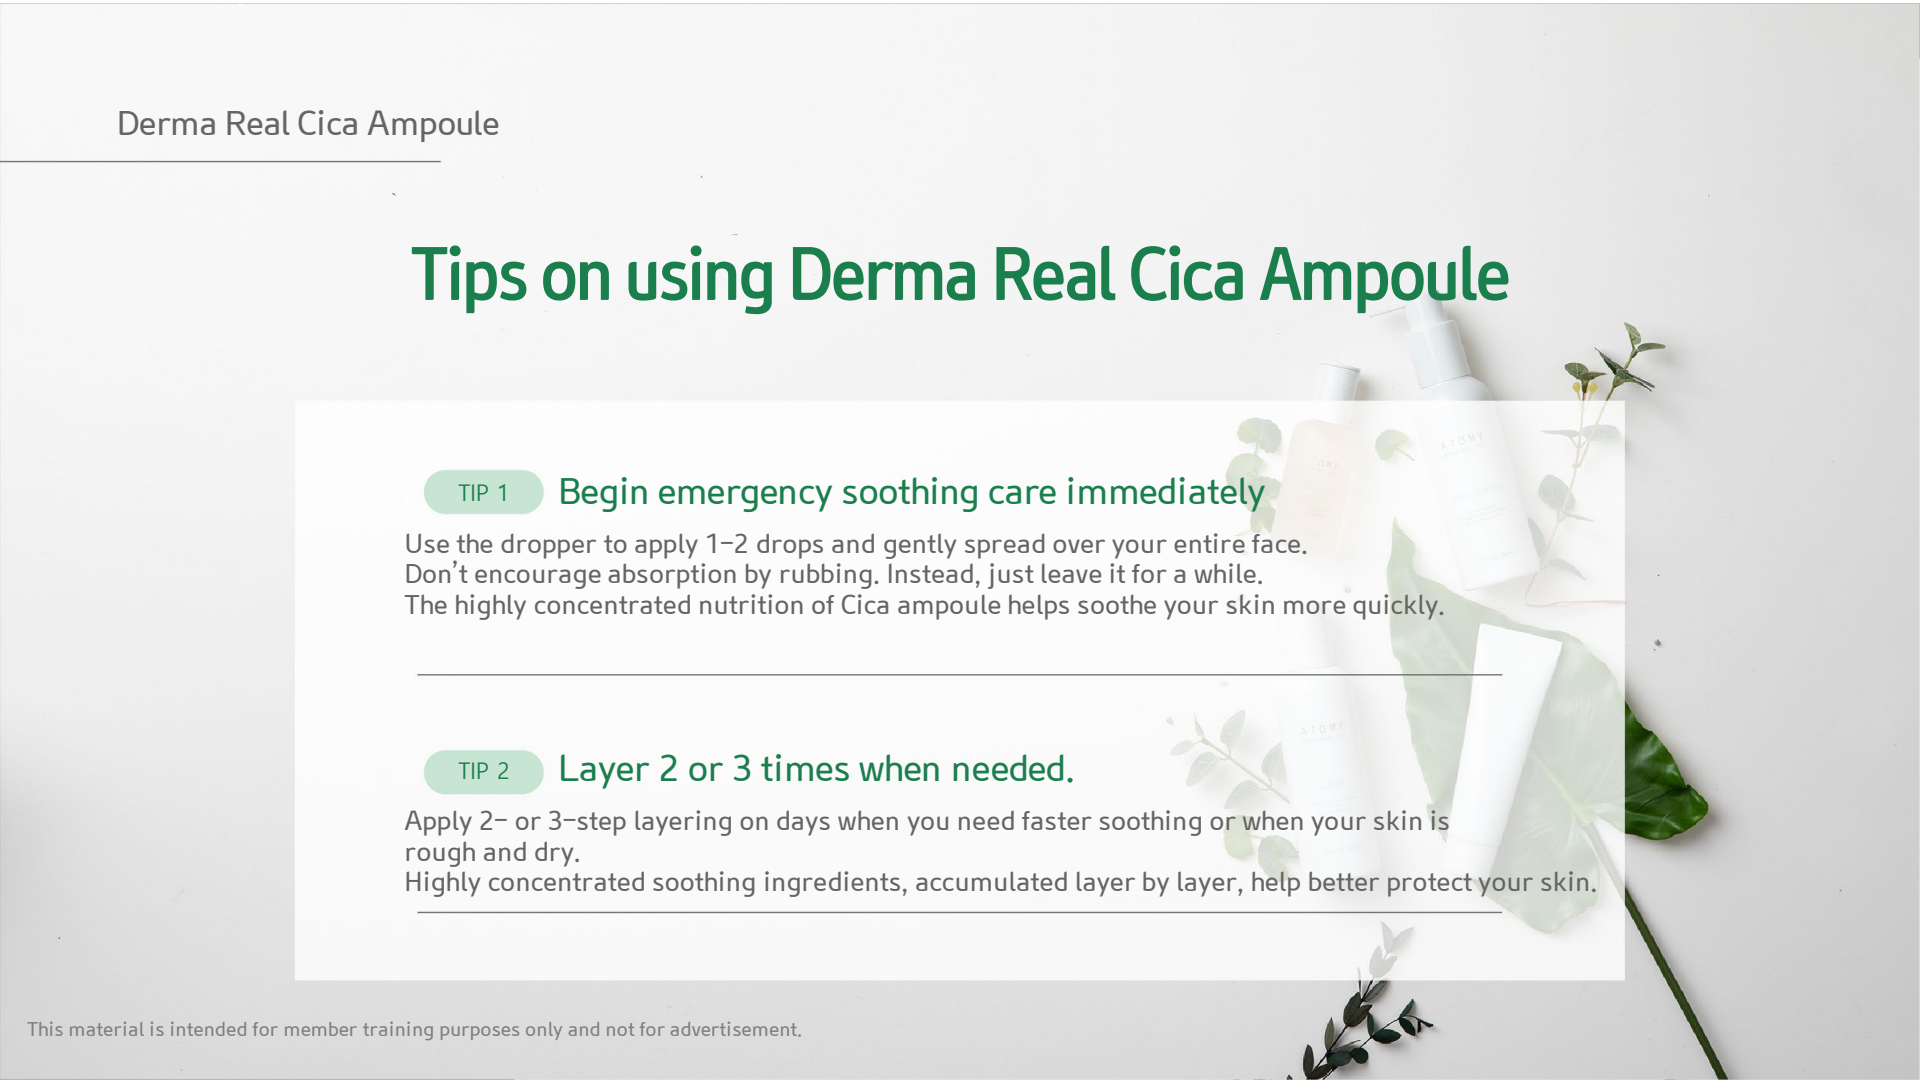

It is a core ingredient for healing wounds that is extracted from the leaves of centella asiatica, collected from the alpine area of Madagascar, a mysterious island, which immediately soothes skin that has been irritated by external factors.

Phyto Coresome

A technology that improves skin penetration using the Centella Calming Complex, centella asiatica peptide, madecassoside, and other complex active ingredients from plants to deliver these ingredients deep into the skin.

This material is intended for member training purposes only and not for advertisement.

Tips on using Derma Real Cica Ampoule

TIP 1 **Begin emergency soothing care immediately**

Use the dropper to apply 1–2 drops and gently spread over your entire face.
Don't encourage absorption by rubbing. Instead, just leave it for a while.
The highly concentrated nutrition of Cica ampoule helps soothe your skin more quickly.

TIP 2 **Layer 2 or 3 times when needed.**

Apply 2- or 3-step layering on days when you need faster soothing or when your skin is rough and dry.
Highly concentrated soothing ingredients, accumulated layer by layer, help better protect your skin.

This material is intended for member training purposes only and not for advertisement.

Soothing, autogenic cream that quickly replenishes with concentrated Cica protection

Dermatest

Hypoallergenic

Green Formula

As a translucent ointment formula, it gently Wraps around the damaged area and strengthens the skin barrier.

This material is intended for member training purposes only and not for advertisement.

Soothing Regeneration Cica Cream

Centella Asiatica Ceramide

100% natural plant-based ceramide that was naturally transformed using natural materials helps quickly restore the skin by strengthening the protective barrier more effectively than regular ceramide.

Madecassoside

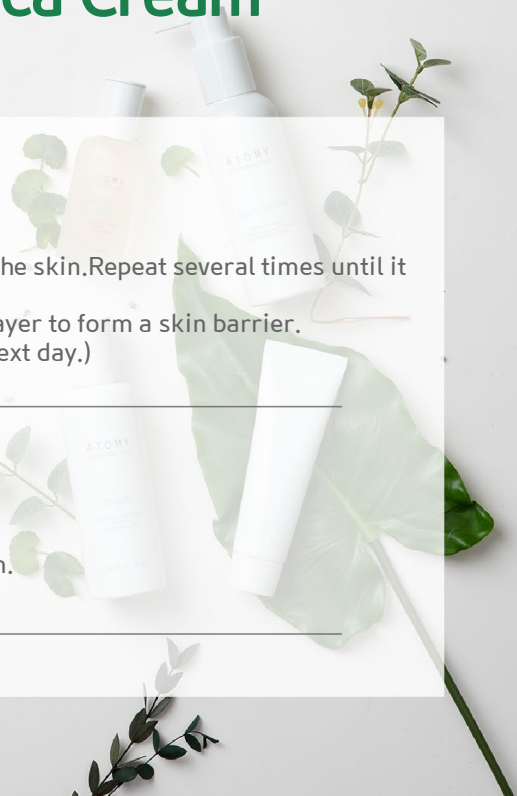

It is a core ingredient extracted from the leaves of centella asiatica, collected from the alpine area of Madagascar, a mysterious island, which immediately soothes skin irritated by external factors.

Tekaoliosome

TECA (Titrated Extract of Centella Asiatica) is the core ingredient of centella asiatica that gets safely delivered to parts of the skin that need it most.

This material is intended for member training purposes only and not for advertisement.

Tips on using Derma Real Cica Cream

TIP 1 Use it as a sleeping mask.

Take an appropriate amount of Cica Cream and apply a thin layer onto the skin.Repeat several times until it becomes thick enough to feel as if you have put on a face mask.
Madecassoside and centella asiatica ceramide wrap around the outer layer to form a skin barrier.
(* A good night's sleep without rinsing it off will result in soft skin the next day.)

TIP 2 Try honey-glow makeup.

Apply a translucent ointment-type Cica Cream to get a natural glow.
Apply a small amount on the face before makeup to achieve radiant skin.

This material is intended for member training purposes only and not for advertisement.

Mildy acidic soothing cleanser that balances sensitive skin

Centella Calming Complex

Dermatest

Hypoallergenic

Green Formula

The transparent gel formula lathers into a rich foam that gently rolls across the surface of the skin without causing irritation to leave the skin feeling moist and refreshed instead of tight after cleansing.

This material is intended for member training purposes only and not for advertisement.

약산성 진정 시카클렌저

Centella Calming Complex

Contains Centella Calming Complex and ceramides that soothe the skin and make it soft and smooth.

Mildly Acidic Cleanser

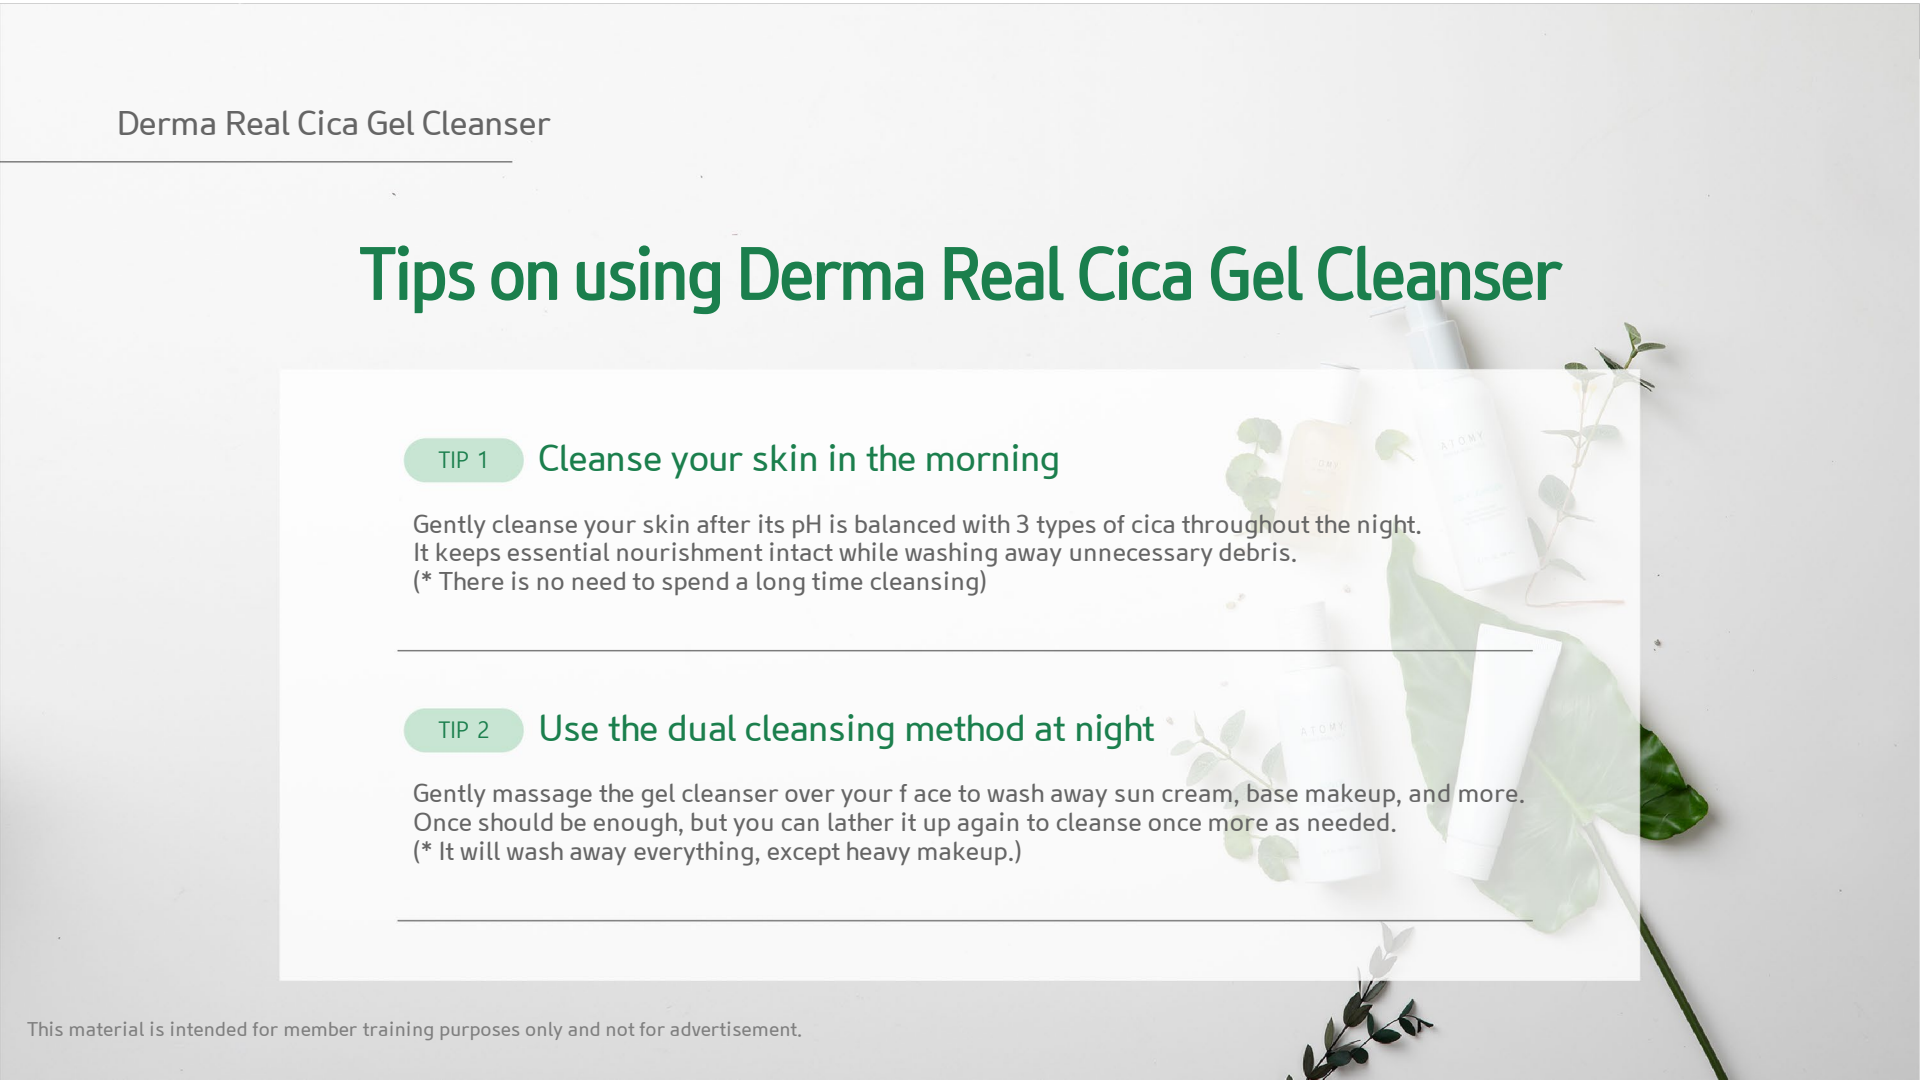

The mildly acidic formula that resembles the pH of the skin helps achieve the right pH balance and protects the skin's natural moisture barrier.

Eye Irritation Test

The results of the eye irritation test showed that the cleanser is mild and does not irritate the skin around the eyes.

This material is intended for member training purposes only and not for advertisement.

Tips on using Derma Real Cica Gel Cleanser

TIP 1 Cleanse your skin in the morning

Gently cleanse your skin after its pH is balanced with 3 types of cica throughout the night.
It keeps essential nourishment intact while washing away unnecessary debris.
(* There is no need to spend a long time cleansing)

TIP 2 Use the dual cleansing method at night

Gently massage the gel cleanser over your f ace to wash away sun cream, base makeup, and more.
Once should be enough, but you can lather it up again to cleanse once more as needed.
(* It will wash away everything, except heavy makeup.)

This material is intended for member training purposes only and not for advertisement.

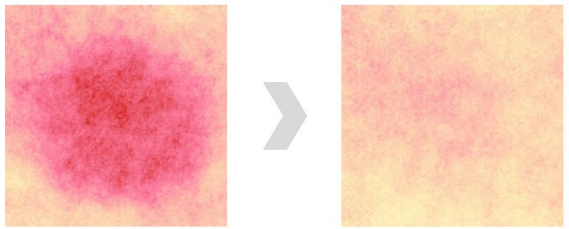

3 weeks after using Derma Real Cica

- Improved soothing effects and reduced skin irritation from external stimuli (chemical stimuli)
- Improved transepidermal water loss (TEWL) of skin damaged due to external stimuli (chemical stimuli)
- Enhance soothing effects and reduced skin irritation from UV rays

This material is intended for member training purposes only and not for advertisement.

. Testing Period : September 16, 2019–November 5, 2019
. Test Subjects : 20 adult women aged 20 to 60

This material is intended for member training purposes only and not for advertisement.

Derma Real Cica for sensitive skin

Derma Test

We have obtained an excellent rating in Dermatest (Germany) sensitive skin irritation tests conducted for sensitive panels. (For all 4 types of Derma Real Cica)

Hyper Allergenic

It was recognized that the probability of causing allergies was low after the hypoallergenic test was completed. (For 3 types of skincare)

Eye Irritation Test

There is no skin irritation around the eyes after completion of the eye irritation test. (For the gel cleanser)

This material is intended for member training purposes only and not for advertisement.

APPENDIX 1

Applied Ingredients and Technology by Product

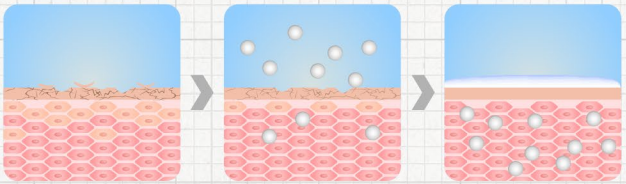

This material is intended for member training purposes only and not for advertisement.

01

Derma Real Cica Toner

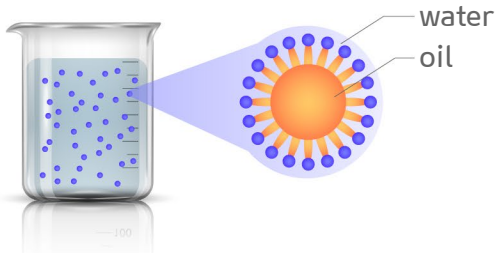

Centella Calming Complex

Helps soothe the skin and provide moisture and nourishment.

1. Rich hydration and nourishment.
2. Forms a moisture barrier to maintain moisture for extended periods.
3. Strengthens the skin barrier to achiev firm, healthy skin.

Oil components were stabilized in an emulsion for more powerful nourishment

'ATOMY CENTELLA CALMING COMPLEX' Applied Ingredients

Centella Asiatica Extract	: "Centella Asiatica Extract"
Calming Water	: Lavendar Extract, Portulaca Extract, Centella Asiatica Extract, Heartleaf Houttuynia, Chamomile Flower Extract, Rosemary Extract, Marshmallow leaf extract, Fennel seed leaf extract, Basil extract.
Centella Asiatica DNA	: Centella asiatica extract, Sodium DNA, Butylene glycol, Purified Water, 1,2-Hexanediol, disodium EDTA, Ethylhexylglycerin

This material is intended for member training purposes only and not for advertisement.

02

Derma Real Cica Ampoule

Skin Calming Membrane Application

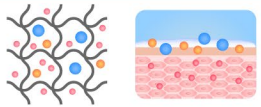

The dual structure with fucose high molecules and hyaluronic acid high molecules forms a protective skin barrier to block contaminants, prevent inflammation, and block moisture loss.
Safe to use on sensitive or allergy-prone skin.

Skin Calming Membrane Technology

Essential Complex
Feels like applying a nourishing ampoule drop

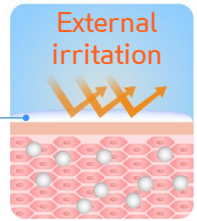

+

Moisture Saccharide
Regenerates damaged epidermis

Dual structure with hyaluronic acid high molecules + fucose high molecules

Moisture/ Defense barrier

Forms a 2nd protective skin barrier

- ☑ High molecules hyaluronic acids
  Prevent moisture loss.
- ☑ Fucose high
  Block contaminants + prevent inflammation

This material is intended for member training purposes only and not for advertisement.

2. Active Ingredients of Ampoule

1 Centella Asiatica Peptide

Outstanding cell differentiation, regeneration, and protective features

- It is an autogenic centella asiatica peptide that was developed based on the “Plant Cell Biofactories™” technology of a 35-year-old Spanish company, one of the world’s leading influences in cell culture.
- The Phyto-Peptidic Fraction (first-generation plant peptide) brings out the hidden power of plants to turn it into active ingredients.
- Phyto-Peptidic Fraction is concentrated with secretome, which is rich with growth factors, and has outstanding cell differentiation, regeneration, and protective features.

Centella Asiatica Peptide Applied Ingredients

Centella Asiatica

: Centella asiatica extract, glycerin, citric acid

2 Madecassoside

Core bioactive ingredients in Centella Asiatica

- This ingredient is obtained by refining and concentrating Madecassoside, which is a core bioactive ingredient of centella asiatica, at a high purity (95%). It is extracted from the leaves of centella asiatica taken from the highlands of the mysterious island of Madagascar.

Treats the skin using the cause of the hyperproliferation phenomenon through 4 different mechanisms

1. Calms dead skin cells and keeps the skin moist through a moisture-supply effect
2. Protects skin cells from UV rays (UVB)
3. Changes irritation signals to adjust cell reactions
4. Strengthens the skin barrier by reconfiguring the tissues of non-cellular substrates (such as collagen fibers, etc.)

This material is intended for member training purposes only and not for advertisement.

2. Active Ingredients of Ampoule

3 Phyto COREsome

Delivers core effective ingredients for shoothing (Phyto + Madecassoside) deep into the skin (COREsome) to relieve skin

Madecassoside ingredients were added to active ingredients extracted from the cell membrane center of plants that help soothe the skin and relieveirritation irritation (red quinoa, centella asiatica, pot marigold) to create a single ingredient. The penetration rate was raised to the liposome level so that it could be delivered deep into the skin and help resolve fundamental skin issues.

Phyto

Plant complex for soothing and relieving irritation

Power of plants that gently soothe sensitive skin

COREsome

Gets delivered deep into the skin to resolve fundamental skin issues

Power of science that quickly soothe skin sentivity

The active ingredients inside the cell membrane center of red quinoa, centella asiatica, and pot marigold were meticulously extracted without loss using low-temperature maceration (10-15C for at least 48hours) and ultrasonic waves.	Madecassoside, an effective ingredient extracted from centella asiatica, is added to create a single ingredient with powerful regeneration effects.	The penetration rate was raised to the liposome level so that effective ingredients could be delivered down to the lowest layer of the skin	Active ingredients reduce inflammatory factors to improve skin sensitivity, while lecithin forms a powerful protective barrier to treat the damaged skin barrier

Phyto COREsome Applied Ingredients Pot Marigold Flower Extract, Madecassoside, Centella Asiatica Extract, Hydrogenated Lecithin, Quinoa Seed Extract, Glycerin, 1,2-Hexandiol.

This material is intended for member training purposes only and not for advertisement.

3 Phyto COREsome

Effective ingredients (Phyto + Madecassoside) were liposomized (COREsome) and delivered deep into the skin to help resolve fundamental skin issues

Madecassoide was added to the active ingredients (Phyto) extracted from the cell membrance center of plants that help soothe the skin and relieve irritation (red quinoa, centella asiatica, pot marigold) and turned into a single ingredient. It was reduced to the liposome level (COREsome) to increase the penetration rate of effective ingredients into the skin to improve skin sensitivity, treat the protective barrier, and help solve fundamental skin issues.

Phyto

Plant complex for soothing and relieving irritation

Red Quinoa

Centella Asiatica

Pot Marigold

+

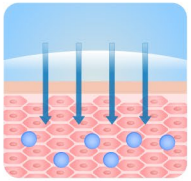

Madecassoside

The active ingredients inside the center of plant cell membranes were meticulously extracted without loss using low-temperature maceration (10–15˚C for at least 48 hours) and ultrasonic waves. Madecassoside, an effective ingredient extracted from centella asiatica, was added to create a single ingredient with powerful regenerative effects.

COREsome

Liposomized to improve the skin penetration rate

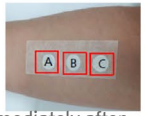

Active ingredients reach the lowest layer of the skin to improve skin sensitivity and form a powerful protective barrier to treat the damaged skin barrier

This material is intended for member training purposes only and not for advertisement.

3 Phyto COREsome

Skin Patch Test Results

Human Toxicity Test (Patch Test)

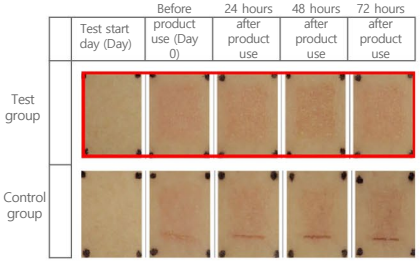

Immediately after applying the sample

24 hours after applying the sample

Upon applying the ampoule to the forearm of 20 healthy men and women in their 20s and 30s for 24 hours by using a fin chamber, the results showed that there were no reactions such as redness or itchiness.

Skin Relaxation test of Phyto COREsomet

To examine the skin soothing effect from external irritation (cause irritation through SLS), 11 healthy female subjects between the ages of 22 and 55 were used in the evaluation over 72 hours. The results showed that there was a significant reduction in redness compared to the control group.

*Sample Usage Method: Use the product after cleansing in the morning and evening (twice a day)

This material is intended for member training purposes only and not for advertisement.

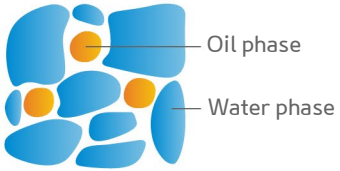

03

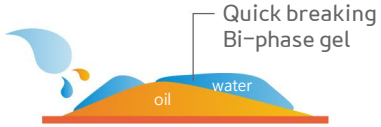

Derma Real Cica Cream

Centella Calming Complex, centella asiatica ceramide, madecassoside, and oliosome were used to supply a high volume of moisture and retain moisture

High content polyol and silky oil were used in conjunction to retain moisture that feels refreshing for long periods of time.

Bi-Phase Gel Technology

- Optimal texture was created through an ideal combination of the oil phase and water phase
- High content moisture stabilization technology

Skin Fit Network

- High content soluble moisture stabilization
- Supplies moisture and locks in moisture

This material is intended for member training purposes only and not for advertisement.

3. Active Ingredients of Cream

1 Madecassoside

Core bioactive ingredients in Centella Asiatica

This ingredient is obtained by refining and concentrating Madecassoside, which is a core bioactive ingredient of centella asiatica, at a high purity (95%). It is extracted from the leaves of centella asiatica taken from the highlands of the mysterious island of Madagascar.

Treats the skin using the cause of the hyperproliferation phenomenon through 4 different mechanisms

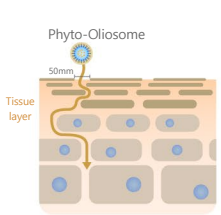

1. Calms dead skin cells and keeps the skin moist through a moisture-supply effect.
2. Protects skin cells from UV rays (UVB).
3. Changes irritation signals to adjust cell reactions.
4. Strengthens the skin barrier by reconfiguring the tissues of noncellular substrates (such as collagen fibers, etc.).

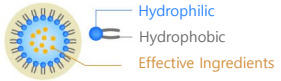

2 TECA-Oliosome

Reverse Micelle delivers effective ingredients that are difficult to Send deep into the skin or difficult to dissolve in water and oil into The Necessary skin areas to maximize effectivenessMicelle

TECA(Titrated Extract of Centella Asiatica) Oliosome

Refers to extracts that contain more than the standard volume of the core ingredients of centella asiatica

Because the outer cell has a hydrophobic reverse-micelle shape, it penetrates the tissue based skin with ease, thereby improving the penetration rate of the effective ingredients from TECA-Oliosome into the skin.

TECA-Oliosome Applied Ingredients

: 'Madecassic Acid, Asiaticoside, Asiatic Acid, Dipropylene Glycol, Ethoxydiglycol, Candida Bombicola/Glucose/Methyl Rapeseedate Ferment, Sunflower Seed Oil

This material is intended for member training purposes only and not for advertisement.

3 Centella Asiatica Ceramide

100% Natural! Plant-based Ceramide

Naturally transformed ceramide helps provide outstanding moisturize and strengthens the skin barrier without harmful ingredients

- Ceramide that was naturally transformed without using catalysts or solvents.
- Only natural substances were made to react to transform ceramide, which leaves zero harmful ingredients on the skin because no purification process is required. (Solvent free, catalyst, no purification process)

Previous Ceramide

- Fermentation + Chemical synthesis process
  p-toluenesulfonyl chloride, Triethylamine and other catalysts and solvents were used.
- Single ceramide
  Structure where oleic acid is attached to phytosphingosine

Centella Asiatica Ceramide

- **Fermentation + Natural transformation process**
  No Solvent, Catalyst or other chemicals
- **Various forms of high efficiency**
  Diverse ceramide complex attached with oil-derived fatty acids such as oleic acid, palmitic acid, and linoleic acid
- **Outstanding effects compared to previous ceramides**
  A ceramide complex with various oil-derived fatty acids was created to achieve various skin effects, such as moisture and powerful skin-friendly properties. Amplified effects through phytosphingosine, which is retained alongside di-glyceride, mono-glyceride, and others that are generated through natural transformation

Centella Asiatica Ceramide Applied Ingredients: Ceramide NP, centella asiatica, phytosphingosine, glycerin, macadamia seed oil, hydrogenated lecithin

This material is intended for member training purposes only and not for advertisement.

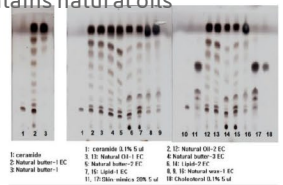

3 Centella Asiatica Ceramide

Test Results

- Ceramide Complex is safe and powerful and is combined with the various effective ingredients of phytosphingosine and natural oils. It offers out standing skin barrier strengthening effects compared to previous ceramide, moisturizes the skin and penetrates quickly and powerfully deep into the skin while also providing anti-inflammation effects.
- Generates the Ceramide Complex with various oil-derived fatty acids for strong skin-friendly properties.
- Amplified effects through phytosphingosine, which gets retained with di-glyceride, mono-glyceride, and others that are generated through natural transformation

Centalla asiatica ceramide containing various fatty acids

Structure of the Ceramide Complex connected with fatty acids that contains natural oils

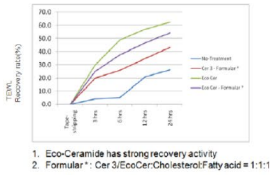

Skin penetration capacity of centella asiatica ceramide

The centella asiatica ceramide structure penetrates the skin faster and more deeply than natural oils.

Outstanding recovery power of centella asiatica ceramide

Superior skin recovery compared to other ingredients

1. Eco-Ceramide has strong recovery activity
2. Formular * : Cer 3/EcoCer/Cholesterol/Fatty acid = 1:1:1

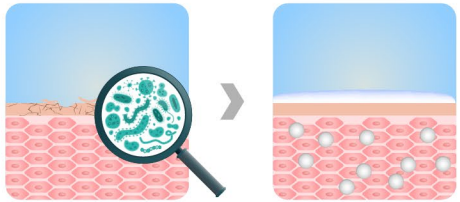

This material is intended for member training purposes only and not for advertisement.

04

Derma Real Cica Gel Cleanser

Mildly acidic gentle cleanser containing the Centella Calming Complex

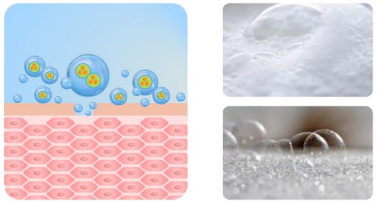

One Touch Mild Cleansing System

Copolymer Stabilization Effect

Cleansing ingredient stabilization using polymers foam boost and moisture barrier sensation

Soft cleansing without irritating sensitive skin

Natural surfactant cleansing

EWG Green Combination of naturally-derived cleansing ingredients.
First makeup melting setp followed by a second foam cleansing step

This material is intended for member training purposes only and not for advertisement.

3. Active Ingredients of Gel Cleanser

Unique Features

Distinction from other Similar Products

Create a smooth gel texture

Becomes a soft and moist gel when applied on the hands.

Melts off makeup and impurities when massage over the face

Create a rich foam when mixed with water

This material is intended for member training purposes only and not for advertisement.

APPENDIX 2

8 different raw herbs included in Calming water

This material is intended for member training purposes only and not for advertisement.

8 different raw herbs included in Calming Water

01

Centella Asiatica Extract

Base ingredient of madecassol ointment that helps heal wounds and regenerate skin

Grass that tigers use to rub their bodies against to heal wounds

- The products is called the “tiger grass cream” in India. Aptly named after a tiger was spotted rubbing itself on the lush grass to heal its wound.
- The Asiatic pennywort, widely known as the main ingredient of madecassol ointment, helps reduce inflammation and reverse the generation of dead skin cells, and the saponin increases the collagen composition to help heal wounds and regenerate skin.

02

Houttuynia Cordata Extract

Product contains anti bacterial, anti-inflamma tory, and antibiotic agents that are effective against dermatitis and acne

10 medicines against 10 illnesses

- This grass grows in the place farthest away from where the atomic bomb exploded in Japan and is known in Japan as a mysterious herb that detoxifies radiation.
- Product is antibacterial, relieves atopy, contains antiphlogistic and anti-inflammatory agents that are effective against dermatitis, skin diseases, and acne.

* Descriptions regarding effects have not been reviewed in accordance with the Cosmetics Act.

This material is intended for member training purposes only and not for advertisement.

8 different raw herbs included in Calming Water

03
Basil extract

Antibacterial and anti-inflammatory agents help soothe skin and give skin elasticity and vitality.

Basil, the Lord of All Herbs

- Known as the “Lord of All Herbs”, it has been widely used in food, medicine, and cosmetics.
- Its antibacterial and anti-inflammatory agents with a clean herbal scent help soothe skin and recover from skin irritation and wounds.

04
Marshmallow

Effective for skin turnover and treating skin dis eases, and against skin irritation.

An herb whose name originates from an ancient word meaning “to heal”

- The mucilage substance that is abundant in the root softens dead skin cells to relieve skin turnover and skin irritation, and helps treat skin diseases.

* Descriptions regarding effects have not been reviewed in accordance with the Cosmetics Act.

This material is intended for member training purposes only and not for advertisement.

8 different raw herbs included in Calming Water

05
Chamomile

Effective for soothing skin, preventing freckles, blemishes, and wrinkles, and improving skin elasticity

Known as the “medicinal plant of the moon,” it helps calm the mind and refresh skin

- Product contains active ingredients such as azulene and Alphabisabolol and provides anti-inflammatory and anti-allergic effects to relieve symptoms of dry and itchy skin, prevents skin aging such as freckles, blemishes, and wrinkles, and helps increase scalp health and skin elasticity.

06
Fennel

Product is rich in calcium, iron, magnesium, and Vitamin C, K, and E to help soothe skin and fight fatigue

Herb that appears in the Greek and Roman Mythology – fennel

- Product is rich in calcium, iron, magnesium, and vitamin K, E, and C to relieve fatigue and alleviate stress.
- Product is rich in ‘anethole,’ a substance that has an effective anti-inflammatory function, according to research by the University of Texas MD Anderson Cancer Center.

* Descriptions regarding effects have not been reviewed in accordance with the Cosmetics Act.

This material is intended for member training purposes only and not for advertisement.

8 different raw herbs included in Calming Water

07 Rosemary

Offers antibacterial, sterilizing, and moisturizing effects

Rosemary also means “tears of the ocean” and ha s a unique scent of the natural sea

- Product contains active ingredients such as azulene and Alphabisabolol and provides anti-inflammatory and anti-allergic effects to relieve symptoms of dry and itchy skin, prevents skin aging such as freckles, blemishes, and wrinkles, and helps increase scalp health and skin elasticity.

08 Lavender

Stabilizes headaches, stabilizes the mind and body, offers antibacterial effects

Originates from the coast of the Mediterranean Sea and its “flower word” in Korean culture is “Fidelity”

- Originates from the coast of the Mediterranean SeaHarvested to collect fragrant oil from flowers and plants and also planted for ornamental purposes Its fragrant oil is often used in perfumes and cosmetic products. Not only is it used as a spice in many culinary dishes, it is also used to treat headaches or provide mental stability. The ancient Romans bathed with lavender in their baths and dried flowers were placed inside drawers or closets for their scent.In a housekeeping book that was published during the time of Queen Elizabeth in Britain, lavender was frequently mentioned for sterilizing and insect-repellent purposes.

* Descriptions regarding effects have not been reviewed in accordance with the Cosmetics Act.
