● REC

Advertisements that are prohibited

in accordance with the Cosmetics Act and other relevant laws

Since advertisements are subject to different interpretations depending on their content, they cannot be used as an absolute criterion.

- 1 Indications or advertisements that may cause the product to be misunderstood as a medical product
- 2 Content that may cause the product to be misunderstood as a functional cosmetic product or an organic cosmetic product
- 3 Content that differs from or goes beyond a review of the stability or effectiveness of a functional cosmetic product
- 4 Content that may cause a foreign product to be misunderstood as a domestic product
- 5 Content that may deceive consumers or cause misunderstanding or confusion
- 6 Indications or advertisements that differ from or are an exaggeration of facts, as well as those that compare or slander products from other companies
- 7 Content that illegally uses or may be misunderstood as a foreign trademark
- 8 Absolute expressions such as “best” or “highest” and comparisons with competitive products are prohibited
- 9 Content regarding quality or effects that cannot be objectively verified
- 10 Expressions regarding cosmetic products containing the processed parts of an internationally extinct or endangered species

Product
Features

Application of the manufacturing technology of red ginseng making it easy to consume

Application of advanced manufacturing technology unique to Hongsamdan Co., Ltd that standardises the size of the red ginseng grains (beads) small and uniform

Smaller and more uniform!

Changed particle size
1.2 ~ 1.7mm(Left) → 0.8 ~ 1.0mm(Right)

· 100% Red ginseng grains relieve the inconvenience of drinking red ginseng concentrate

Ensuring the homogeneity of particles

Increased product quality by reducing particle size deviations (large and small) and reducing particle breakage.

Increased convenience of consumption

More convenience in intake due to faster dissolution rate in water (increased dissolution rate by 20-30% compared to existing products)

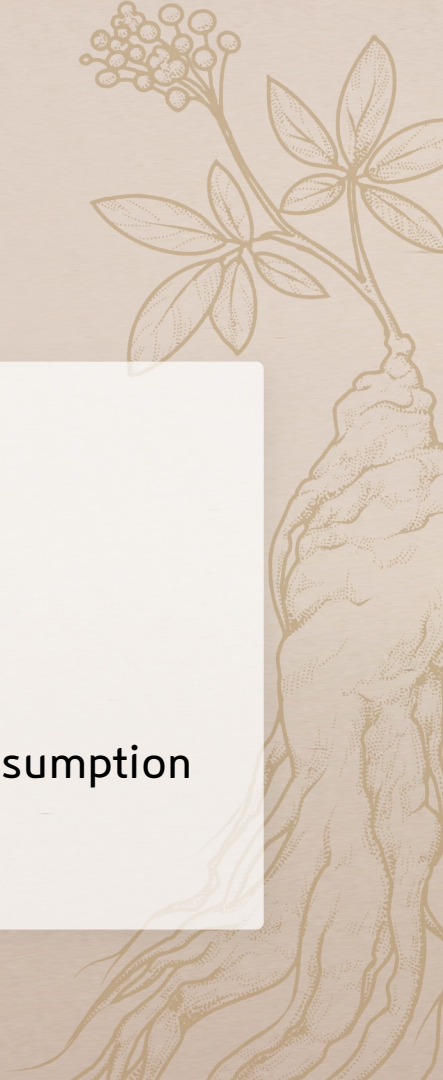

Product
Features

Easy consumption Anytime, Anywhere

Easy-to-carry disposable sachet
packaging

At home,
At work,
During travel,
Anytime, Anywhere,
Convenient, easy consumption

Precautions

Precautions for consumption

Daily intake

- 1 sachet a day for adults
- 0.5 sachet per day for under 18 years old

How to consume

- Eat it as it is or dissolve it in water
- The substances that is dissolved in water and precipitated is red ginseng powder, so it is safe to consume.

Precautions for consumption

- If you have allergies and specific constitution, take it after checking the ingredients, and be cautious when taking medicines (diabetic drugs, blood anticoagulants).
- Please seal the opened sachet and store it in cool place, and eat it as soon as possible.

Storage methods

- This product is 100% red ginseng grains and can become sticky easily due to moisture or heat, so store it in a cool place away from moisture and direct sunlight, especially avoid refrigerator storage.
- The product is highly hygroscopic, so the grains may clump together during storage but it has not deteriorated, so it is safe to consume.
