Advertisement that are prohibited by laws on cosmetic products and other relevant laws

Since advertisements are subject to different interpretations depending on their content, they cannot be used as an absolute criterion.

- 1 Indications or advertisement that may cause the product to be misunderstood as a medical product
- 2 Content that may cause the product to be misunderstood as a functional cosmetic product or an organic cosmetic product
- 3 Content that differs from or goes beyond a review of the stability or effectiveness of a functional cosmetic product
- 4 Content that may cause a foreign product to be misunderstood as a domestic product
- 5 Content that may deceive consumers or cause misunderstanding or confusion
- 6 Indications or advertisements that differ from or are an exaggeration of facts, as well as those that compare or slander products from other companies
- 7 Content that illegally uses or may be misunderstood as a foreign trademark
- 8 Absolute expressions such as "best" or "highest" and comparisons with competitor products are prohibited
- 9 Content regarding quality or effects that cannot be objectively verified
- 10 Expressions regarding cosmetic products containing the processed goods of an internationally extract or endangered species

For official information on Atomy products, please refer to the features, details, or descriptions of each product at www.atomy.kr.

This presentation is intended for Atomy contractors and should not be passed on to consumers. Filming or recording of training materials is prohibited.

meet **everyday skincare**.

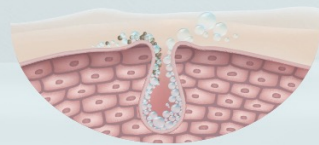

An evening routine that takes care of your skin

Atomy Evening Care Set

Cleansing Solution

Why is cleansing necessary

Dirt such as makeup residue, sebum and sweat that attaches to the skin surface as well as dust and harmful substances that makes using a cleansing product that has the ability remove and clean the skin necessary. It facilitates blood circulation, the physiological function of the skin, and helps absorb active ingredients in products such as skincare.

Let's cleanse, smartly and meticulously!

When choosing a cleansing product, it's best to choose a product that can cleanly remove dirt and makeup whilst balancing the skin's oil and water level. Also, to avoid skin irritation, make sure to create the foam in your hand first, and to avoid damaging the skin barrier, try to avoid cleansing skin too harshly. When rinsing with water, try splashing the water on your face to avoid touching your face.

- ✓ Use each step meticulously
- ✓ Reduces skin irritation
- ✓ Non-damaging to the skin barrier
